

Stock	Description	Week Number Availability:
Aubergine ~ Black Pearl F1 (Grafted)	The fruits set regularly throughout the growing season and the plant is well balanced with a very high overall production; less spiny than most; suitable for non-heated and plastic tunnels.	16 19
Basil ~ Greek (Ocimum minimum)	Small-leaved variety; approx height 23cm (9")	18 19 20 21 22 23 24 25 26 27 28 29 30
Basil ~ Lime (Ocimum americanum)	Very similar to lemon basil, but with the distinct aroma of lime. Dark green, small leaves give a delightful citrus flavour to fish and salads. Height 45cm.	18 19 20 21 22 23 24 25 26 27 28 29 30 31
Basil ~ Red	Strong bascent but very decorative also, with purple leaves setting off pale pink flowers. Height 45cm.	18 19 20 21 22 23 24 25 26 27 28 29 30 32
Basil ~ Siam Queen (Ocimum basilicum)	A cultivar of Thai basil which is more suited to our climate.	18 19 20 21 22 23 24 25 26 27 28 29 30
Basil ~ Sweet Genovese (Ocimum basilicum)	Large, bright green leaf, quality market, gardener strain. Classic variety used for pesto	18 19 20 21 22 23 24 25 26 27 28 29 30
Bean (Climbing) ~ Borlotti (Lingua Di Fuoco)	Italian bean with speckled green and red pods - use as both green pod and dried bean.	18 19 20 21 22 23 24 25 26 27 28 29 30
Bean (Dwarf French) ~ Stanley	A white flowering, widely seeded variety that reliably delivers impressive yields of top quality beans. Medium green pods, 14cm x 10mm in size. Early maturity. Suitable for early and late sowings. Resistant to Halo Blight, Anthracnose and BCMV.	18 19 20 21 22 23 24 25 26 27 28 29 30
Bean (Runner) ~ Firestorm	Scarlet flowering, top quality 25cm (10") pods. The first self-fertile stringless runner bean. Will set in any weather conditions. Height 3m (10') spread 30cm (12").	25 26 18 19 20 21 22 23 24
Beetroot ~ Avalanche F1	Produces pure white roots with a round uniform shape. Fantastic sweet flavour and is an ideal replacement for Detroit White.	18 19 20 21 22 23 24 25 26
Beetroot ~ Boldor F1	Outstanding in colour and quality, does not bleed when cooked.	10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28
Beetroot ~ Boro F1	A good quality variety producing smooth-skinned, dark red roots. Good storage performance. Suitable for both 'baby' and standard beet production.	10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28
Beetroot ~ Chioggia Barbietola	Traditional Italian variety with decorative white rings when sliced; very tender with a mild flavour.	10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28
Broad Bean ~ Masterpiece Green Longpod	A favourite variety, superb flavour, heavy yields, excellent for freezing or cooking whole young pods.	09 10 11 12 13 14 15 16 17
Brussels Sprouts ~ Doric F1	A high-yielding variety that produces smooth, round buttons; Doric F1 is a vigorous grower with a strong stem and good standing ability.	19 20 21 22 23 24 25 26
Brussels Sprouts ~ Nautic F1	Vigorous variety, matures mid December but holds until February; sweet and pleasant taste.	18 19 20 21 22 23 24 25 26
Brussels Sprouts ~ Petrus	Suitable for late harvest in the Mid winter period of January and February with excellent frost tolerance and holding ability. Produces a uniform high quality button. Excellent variety for Scotland and Lincolnshire. Attractive dark green button	20 21 22 23 24 25 26
Buttonhole Kale ~ Starmaker	Forms a small rosette head that makes a fantastic high value product for contemporary dining. Bold, bright pink ribs contrast against the dark green sweet leaf. The outer leaves can also be cut and used as a colourful shredded product to give added value.	26 28 30 32
Cabbage ~ Buscaro F1	Autumn red with a very long field standing ability.	16 17 18 19 20 21 22 23
Cabbage ~ Cantata F1	A late maturing savoy for cutting December to March. Dark green, finely blistered, flattish heads and outer leaves. Will stand for a long time so can be cut as needed through winter.	22 23 24 25 26
Cabbage ~ Caraflex F1	A new pointed cabbage with a smooth, conical shape; sweet-tasting; matures approx. 75 days from planting.	12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36
Cabbage ~ Deador F1	A hybrid variety of this traditional type of cabbage with dark-green outer leaves. Deadon produces solid heads with a red tinge. Maturity approximately 110 days after transplanting.	18 19 20 21 22 23 24 25 26 27 28 29 30
Cabbage ~ Drago F1	Hybrid green ball-head cabbage which provides tight, high quality cabbages about 1kg in weight. Harvest September-October.	15 18 19 20 21 22 23 24
Cabbage ~ Duncan F1	Compact attractive habit, produces excellent greens and hearts.	37 38 39 40 41 42
Cabbage ~ Elisa F1	Elisa F1 is a first early cabbage maturing in 60-65 days from June to July. Elisa F1 has a bright colour and gives good results under fleece or plastic. Elisa F1 has an excellent sweet flavour. Elisa F1 can be used to produce mini heads.	12 13 14 15 16 17 20
Cabbage ~ Famosa F1	A dark green, round early savoy that is well wrapped. The savoy is medium to fine and the heads have a good density. Vigorous and uniform heads.	13 14 15 16 17 18 19 20 21 22 23 24 25 26 27
Cabbage ~ Integro (Red)	Good shape, ideal for fresh market. Suitable for harvest in August and September. Approximately 95 days from transplant to maturity.	25 26
Cabbage ~ Parisa F1	This cabbage is a Savoy type. Very late reliable variety; usual maturity period - December to March.	23 24 25 26 27
Cabbage ~ Stanton F1	A cross between Danish and Savoy cabbage. Stanton produces compact, dark green round heads. A vigorous variety with excellent standing ability and cold tolerance. Maturity approximately 130 days after transplanting.	20 21 22 23 24 25 26 27 28 29
Cabbage ~ Winterjewel F1	Produces evenly sized, smooth, dark leaved greens as a spring green or, if allowed to heat, will eventually form compact 250g (8oz) loose heads. Superb winter hardiness and has excellent flavour and bolting resistance. Spring maturing (36 weeks maturity).	37
Cabbage ~ Wirosa	Excellent quality with long standing ability. Finely blistered leaves with vigorous plant habit. Usual maturity period October-February.	22 23 24 25 26 27
Calabrese ~ Sibsey F1	Broccoli 'Sibsey F1' is a fabulous sweet stem broccoli, similar in appearance to Cima di rapa (Wild Broccoli). High in nutritional value, this tasty Calabrese fetches a high price in the supermarkets. The tender stems are so sweet that you can even eat them raw!	12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30
Calabrese ~ Ironman F1	Vigorous variety with dome-shaped head. Produces side-shoots after the main head has been cut.	12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30
Calabrese ~ Monclano F1	Monclano is a club root resistant variety which produces a firm, domed head with a good standing ability. Variety produce a large, central green head and once this has been harvested a second crop of smaller individual spears is produced.	13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30
Cauliflower ~ Alpinis	Very late winter variety maturing in late May in Lincolnshire, 295 days, from an early August planting. Produces very dense curds, highly suited to either facepack or processing. Performs best when planted on more fertile soils and top-dressed to encourage spring re-growth.	27 28 29 30 31
Cauliflower ~ Belot F1	Belot F1 Produces high quality heads for cutting October to December. It produces excellent deep clean white curds.	26 27
Cauliflower ~ Chester F1	Good vigour, for late May cropping.	27 28 29 30 31
Cauliflower ~ Fortaleza F1	Fortaleza is known for its reliable grow days and ability to produce a high quality face-pack product. Growers can rely on Fortaleza for a stable crop performance in fluctuating circumstances. It is a main season variety, maturing in 75 to 80 days.	12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28
Cauliflower ~ Isadora	A strong, healthy variety with good cover to its attractive white curd.	27 28 29 30 31
Cauliflower ~ Jerome F1	Consistent performer which produces solid, well-wrapped curds.	27 28 29 30 31
Cauliflower ~ Lavender F1	Purple curds; perfect for adding colour to any summer or autumn dish; delicious and highly nutritious; good heat tolerance.	14 15 16 17 18 19 20 21 22 23 24 25 26 27
Cauliflower ~ Medallion F1	A compact habit, offering good curd protection; will grow well in most areas; deep, white curds; matures February in most areas. Very good quality curd. For March harvest under most conditions.	27 28 29 30 31
Cauliflower ~ Sunset F1	Sunset F1 has unique orange curds; it is great raw in salads or as a cooked vegetable. Semi-upright habit with medium green leaves. Performs best when used for September and October harvesting.	22
Cauliflower ~ Trevi F1	Extremely uniform orange curled type. The plant structure is uniform and semi-prostrate, yielding very smooth, round, light green heads that are bract-free. Plant from June, heading September-October.	22
Cauliflower ~ Veronica F1	Romanesco type with lime-green 'pinnacles'.	23 24 25 26 27
Celeriac ~ Prinz F1	Main crop variety with a good bolting tolerance. Smooth, round shaped roots.	18 19 20 21 22
Celery ~ Victoria F1	Mid-green variety, good standing ability and excellent flavour. Doesn't require 'earthing up'.	15 16 17 18 19 20 21 22 23 24 25 26 27
Chard ~ Firewoks	A mixture of colours including white, cream, yellow, orange, pink and red. Produces a vibrant mix of very attractive coloured stems. Making an eye-catching crop to any garden, these can be harvested as both baby leaf and fully grown.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37
Chard ~ Swiss Chard 'Forthook'	Swiss Chard 'Forthook' is a heavily savoyed dark green leaf blades cook quickly to a tasty soft spinach. White stems should be cooked separately like celery or stir-fried to add a crunchy bite.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 34
Chili Pepper ~ Jalapeno	Mexican type - pick green or red, firm, crisp & HOT!!! Earlier and better adapted to cooler growing conditions than standard 'Jalapeno'.	16 19
Chili Pepper ~ Padron	Spanish 'Tanais' padron pepper. Plants are conical, slightly wrinkled with a long curved stalk. Fruits should be picked at green immature stage when only a small percentage will be hot.	16 19
Chili Pepper ~ Red Flame	An elongated Cayenne type hybrid with long, thin, wrinkled fruit, which are typically 12.5cm long and 1.1cm in diameter. Fruit weigh on average 5.5 grams. Young green fruit turn red when mature. Extremely hot.	16 19
Chinese Cabbage ~ Kaboko F1	A very early variety producing dark green cylindrical heads. It matures approx. 49 days after transplanting.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30
Chinese Mustard ~ Golden Streaks	Mustard Golden Streaks has very finely serrated leaves with a good texture. It has a sweet Mustard taste with a surprising hint of new potatoes making it an excellent addition in salads.	10 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Chinese Mustard ~ Ruby Streaks	Red serrated leaf mustard greens for baby leaf and salad mixes. Ruby Streaks has delicate deeply serrated burgundy leaves with red veining on lime green stems. This fast growing variety has a delicious sweet mustard flavour.	10 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Chives	A member of the onion family producing slender, hollow leaves and dainty clumps of pink to purple flowers; extensive culinary uses. Hardy perennial.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 37
Coriander ~ Cruiser	Cruiser has rapidly become market leader due to its versatility and consistent quality. Plants are compact with large, shiny green leaves and good basal branching habit. Vigorous, but slow bolting, useful for all season field crop or pot production. P.V.P.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 36
Corn Salad ~ Vit	Particularly robust variety with high yields, the leaves are round and thick and have a wide leaf blade up the beginning of the stem even if maturity is exceeded.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 39 40 41 42
Courgettes ~ Ladoga	A high yielding variety with medium green, long cylindrical fruits. Grow days 41 day from transplanting.	18 19 20 21 22 23 24 25 26
Courgettes ~ Safari F1	A unique variety that produces high yields of striking green striped, cylindrical fruits. Spine free, bush habit. Contrasts well with conventional courgette varieties.	18 19 20 21 22 23 24 25 26
Courgettes ~ Satellite F1	Dark green variety with round and uniform fruits.	18 19 20 21 22 23 24 25 26
Courgettes ~ Sunstripe F1	Wonderfully vibrant golden yellow striped tasty fruits; plants have a bush habit and gold marking on the leaves; high-yielding with great flavour and texture.	18 19 20 21 22 23 24 25 26
Cress ~ American land cress	Flavour is very similar to watercress, though the leaves are coarser. Remains green all winter.	31 32 33 34 35 36 37 38 39 40 41 42
Cucumbers ~ Passandra F1	The perfect choice for smaller households, this all-female variety produces a heavy crop of 6in-long mini-cues which are big on flavour and crunch. Easy to manage, the plants have good resistance to mildews and mosaic virus.	16 19
Cucumbers ~ Picolino	Mini-cucumber measuring about 12 cm long; high yields and good quality; best grown under cover.	16 19
Dill ~ Hera (Anethum graveolens)	A late bolting variety with stiff growing habit with much leaf mass, dark blue-green colour.	18 19 20 21 22 23 24 25 26 27 28 29 30
Dwarf French Beans ~ Purple Teepee	Purple Teepees is a high yielding variety with colourful purple pods. The round beans are stringless when young and up to 15cm (6in) long. High yielding. Tasty when cooked and eaten in salads, or boiled conventionally (though the pods turn green on cooking).	18 19 20 21 22 23 24 25 26
Endive ~ Myrna	Myrna is ideal for Summer and Autumn harvest which has a high tolerance to bolting and necrosis and an appealing leaf curl.	28 35
Fennel ~ Bronze	Harvest the leaves at any time, good in soups, salads and with fish. Hardy herbaceous perennial.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Fennel ~ Rondo F1	This is an early variety suited to summer cropping. Bulbs are round with maturity approximately 75 days after transplanting.	18 23 28
Kale ~ Nero di Toscana (Elsom's Strain)	A winter hardy variety, similar to Nero di Toscana, but selected from open-pollinated stock for British growing conditions. Long, thin leaves with a Savoy-type blister.	18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34
Kale ~ Red Russian	Serrated leaf margins with deep purple veins; hardy and stands for a long time.	18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 34
Kale ~ Redbor F1	Distinctive red, densely curled leaves for picking throughout the Winter and Spring.	18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34
Kale ~ Westland Winter	Large spreading plant habit with curled blue-green leaves. Winter hardy for cropping from October to February.	18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34
Kalettes® ~ Autumn Star	Autumn Star (TZ 0357) is the earliest of the three Kalettes® varieties, maturing from October.	19 20 21 22 23 24 25 26
Kalettes® ~ Christmas Rose	The flower-like rosette sprouts which develop on the stems can be harvested from November to December.	19 20 21 22 23 24 25 26
Kalettes® ~ Snowdrop	Snowdrop (TZ 0101) is an extremely winter hardy Kalettes® variety with slightly shorter stems which are resistant to lodging in high winds, this variety matures from January to February.	19 20 21 22 23 24 25 26
Kohl Rabi ~ Kolibri (Purple) F1	Mid-early variety. Purple skinned with flattish round shape and excellent white flesh quality.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Kohl Rabi ~ Korist (Green)	Very early, white-skinned variety, suitable for forcing; flattish globe shape with mild, crisp flesh; holds well without getting woody; strong, erect and vigorous foliage.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Komatsuna ~ Malachai	Robust and reliable; nice, upright habit, easy to harvest; long-standing and with good yield potential; versatile for babyleaf or wholehead.	10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Leaf beet ~ Erbetta	Paler green leaves with thinner rib than normal perpetual. Excellent texture and flavour.	10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Leek ~ Belton	High resistance to rust	15 16 17 18 19 20 21 22 23 24 25 26
Leek ~ Jolant	Early variety with upright, smooth stems and medium-long shafts. Vigorous and heavy yielding.	15 16 17 18 19 20 21 22 23 24 25 26
Lettuce ~ Admir (green oakleaf)	Fresh green Oakleaf	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Alaine (red Gem)	Red gem lettuce. Outdoor production. Nice dark red colour. Slow filling, slightly open and slow bolting. Slightly larger than most gem varieties. The plug plants are supplied in non-returnable trays.	12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Analara (butterhead)	Red let mixture sized butter head variety for Spring till Autumn period. Very nice heading, holds well in the field and strong against IBT and bolting with new Bremia resistance genetic. Suitable for fresh and processing market, with high percentage harvest rate.	13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Azirka (lollo rossa)	Azirka is a triple Red crunchy Lollo type, with round shaped 3D structure and thick crunchy leaves which looks good in a trio.	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Barlach (red multileaf, Salanova)	Multi-leaf Salanova(r) type with striking red/bright green bicoloured tender leaves.	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Brighton (glasshouse butterhead)	A reliable variety with a fresh green colour.	33 34 35 36 37 38 39 40 41

Stock	Description	Week Number Availability:
Lettuce ~ Eduardo (Iceberg)	Eduardo as a reliable variety, which can be used from mid-spring until autumn. The plug plants are supplied in non-returnable trays.	12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31
Lettuce ~ Elle (Iollo biondo)	Mild to dark green open heads with very finely curled leaves. A leaf type that suit both sandwich production and fresh whole head. The plug plants are supplied in non-returnable trays.	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Expertise (green frizzy, Salanova)	Dark green leaf like Expedition but more compact plant habit. Leaf stems are shorter and more incised with less trimming and wastage when processing. Shorter core and slower bolting. Crisp texture with good flavour suitable for year round. production in most areas.	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Frostex (red frizzy, Salanova)	Frostex is a red incised leaf lettuce of the Salanova crispy type.	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Magenta (red oakleaf)	A triple red oak leaf lettuce.	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Maconi (red Batavia)	A red Summer Crisp with good flavour. Shiny, slightly puckered, red-tinged leaves form a whorled, conical head with a crispy green heart. Ideal for spring and summer plantings. Tolerant to bolting, tipburn, and bottom rot.	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Maureen (little gem)	Good taste and shape, well closed heads.	09 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Moonred (red cos)	Little Gem, dark shiny red, for North- and South Europe.	12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Olana (green Batavia)	Batavia, the most common lettuce in France, can be red or green. It has an earthy flavour and a slight crunch to the leaves. The plug plants are supplied in non-returnable trays.	12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Lettuce ~ Patrona (red Cos)	Patrona is a large, dark green cos lettuce for outdoor production. Suitable for fresh wholehead, processing and machine harvesting.	13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Marrow ~ Tiger Cross	An early bush variety with highly uniform mid green and cream striped fruits. The first hybrid to have intermediate resistance to Cucumber Mosaic Virus. It is now very popular and is grown across the UK and Europe.	18 19 20 21 22
Mibuna ~ Mibuna	Clump-forming Japanese vegetable with long narrow leaves. Use raw in salads, or cook as other oriental greens e.g. stir-fry, steam or in soups	10 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Mint ~ Spearmint	Garden or spearmint; use for minty sauce, new potatoes, etc. Hardy herbaceous perennial.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Mizuna ~ Mizuna	Makes a rosette of finely cut leaves with broad white petioles.	10 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Mustard ~ Giant Red	Large 'savoy' leaves which are deep purple / red in colour. Pleasant mustard pungency. Use immature for salads.	10 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Onion ~ Apache	Attractive and versatile red skinned variety (A, cepa type) with mild flavour and crisp texture. Apache has been developed to satisfy the market demand for a red salad onion which is vibrant and also peels. For spring, summer and autumn production.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39
Onion ~ Giobo	Giobo is a large straw coloured onion which is tasty raw in salads or cooked. Because of its sheer size, it also makes for an ideal exhibition variety.	15 16 17 18 19 20
Onion ~ Highlander	Highlander is resistant to downy mildew and has mid-late maturity. Attractive brown globe-shaped bulbs are suitable for mid to long term storage.	15 16 17 18 19 20
Onion ~ Matrix (08-527)	Now known as Matrix (08-527). The Winter-hardy spring onion with slight bulb swelling, resistant to fusarium basal rot and pink root (rhoma). Very vigorous growth with dark green robust foliage; resistant to bolting.	38 39 40 41 42
Onion ~ Overwintering Japanese ~ Tough Ball F1	Overwintering Japanese onions which mature from the end of June next year. They start to 7bulb up? from May, so if you're short of an onion which you can go and pull one while the tops are still green.	38 39 40 41 42
Onion ~ Parade	Very attractive salad onion which does not bulb; strong, upright, dark-green leaves.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39
Onion ~ Redspark F1	Hybrid red onion, which yields slightly less than Red Baron but gives a high percentage of pre-pack quality. The plug plants are supplied in non-returnable trays.	15 16 17 18 19 20
Oregano	Sun-loving, herb with dark green leaves. Hardy herbaceous perennial.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Pak Choi ~ Joi Choi F1	An outstanding white-stemmed variety with a very high percentage of marketable plants. Slow to bolt with shiny, dark-green leaves. Excellent frost resistance.	10 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Pak Choi ~ Red F1	Changes from dark green leaves with maroon veins to dark maroon leaves with green underside when mature.	10 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Parsley ~ Italian Giant (Flat leaf)	Dark green, flat leaves with strong stems. Use leaves for garnishes, salads, and cooking. For highest yields, provide ample water and fertility. Parsley ~ Krausa	A densely curled, long stemmed variety with rich green leaves. Excellent flavour and habit. Fast re-growth after cutting.	13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39
Pea ~ Kelvedon Wonder	Heavy crops of excellent flavoured small peas height 45cm.	09 10 11 12 13 14 15 16 17
Pumpkin ~ Atlantic Giant	(C. maxima) 110-125 days. Lovely, giant, pink-orange pumpkins can weigh over 800 lbs, and do so every year, with some reaching almost 1500 lbs.1 This variety was introduced by Howard Dill in the USA in 1978, and has since broken all records.	18 19 20 21 22
Pumpkin ~ Becky	Attractive small pie pumpkin with a tan handle.	18 19 20 21 22
Pumpkin ~ Jack O' Lantern	Excellent Halloween pumpkin; bright orange skin and very tasty orange flesh.	18 19 20 21 22
Pumpkin ~ Polar Bear	Extra-large white pumpkin which retains its colour well after maturity in the field. Popular in decorative displays.	18 19 20 21 22
Pumpkin ~ Racer F1	5 to 7 kg round fruits with good colour and strong handles. Semi-bushy variety which matures early. A consistent, high yielding pumpkin. Without doubt our best-selling Halloween variety.	18 19 20 21 22
Radichio ~ Rubro	Very large variety producing heads of good colour and internal quality. Can be cool stored for up to one month. A late maturing variety with excellent winter hardiness, enabling production into the New Year.	28 35
Rhubarb ~ Victoria	Excellent flavoured variety for maincrop use.	15 16 17 18 19 20 21 22
Rocket ~ Athena 1441	This wild rocket has serrated type with upright leaves. It is apart of groundbreaking work has been carried out by the Tozer Seeds, who have bred in intermediate resistance to downy mildew for this variety Athena.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41
Rosemary ~ Rosemary	Aromatic needle-shaped leaves; many culinary uses. Hardy perennial evergreen.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Sage	Common or garden sage; oval, grey-green leaves; good for stuffings; hardy perennial evergreen.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Shallot ~ Matador	Globe-shaped reddish-brown shallots; excellent skin quality. The plug plants are supplied in non-returnable trays.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Shallot ~ Zebrune (Banana shallot)	Zebrune has a good resistance to bolting, and produces long brown bulbs which are tinged with pink. They are best grown on well-drained soil in a lovely sunny location. Shallots can be used in a variety of dishes and meals.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 37
Sprouting Broccoli ~ Burbank F1	A white hybrid, producing strong vigorous plants with a high yield of succulent white spears. Plants first produce a large central spear, once this is removed many smaller spears will develop over several weeks.	14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39
Sprouting Broccoli ~ Burgundy	Burgundy provides fresh and tender spears, which are easy to prepare. Burgundy has a vibrant purple colour and a sweet taste and is available in a variety of formats, suiting consumers and retailers.	27 28 29 30 31
Sprouting Broccoli ~ Burgundy	Burgundy provides fresh and tender spears, which are easy to prepare. Burgundy has a vibrant purple colour and a sweet taste and is available in a variety of formats, suiting consumers and retailers.	18 19 20 21 22 23 24 25 26 27 28 29 30 31
Sprouting Broccoli ~ Claret F1	Large, vigorous plant producing heavy, good quality spears; harvest from late March to late May.	27 28 29 30 31
Sprouting Broccoli ~ Mendocino	Very uniform hybrid producing good yields of excellent quality spears. Follows Santee and Rioja giving consistently high quality in this 'early maincrop' period.	27 28 29 30 31
Sprouting Broccoli ~ Rioja	Early vigorous habit which is suited to early Spring harvests.	27 28 29 30 31
Squash ~ Bright Summer F1	Bright summer combines a good vigour with an easy and early setting, resulting in 4-6 fruits of 0.6g- 1kg per plant. The fruits are rather flat, round and have a smooth skin with clear stripes.	18 19 20 21 22
Squash ~ Buttercup	Buttercup has the reputation of being one of the most delicious squashes ever. It has green, slightly knobby skin and firm, sweet, flesh. Buttercup is a flattened globe shape and quite large weighing in at about 2kg. It is ideal for roasting as well as soup and pumpkin pie.	18 19 20 21 22
Squash ~ Futsu Black	A small, pumpkin shaped squash that has heavily ribbed black skin which will turn orange if left to mature fully. Excellent flavour when roasted.	18 19 20 21 22
Squash ~ Harlequin	Green-striped acorn squash with exceptionally sweet flesh.	18 19 20 21 22
Squash ~ Little Gem	This trailing Little Gem squash produces many cricket ball sized, dark green fruits. Dark orange, sweet flesh. Very productive plant.	18 19 20 21 22
Squash ~ Sombra F1 (Winter)	Winter Sweet Sombra delivers a combination of sweetness, flaky texture and depth of flavour. Best eating quality between 2 and 5 months after harvest.	18 19 20 21 22
Squash ~ Sunburst (Summer)	A scalloped-edge 'patty-pan' type producing attractive, golden-yellow fruit; delicious flavour when steamed.	18 19 20 21 22
Squash ~ Sweet Dumpling	Fruits are creamy white with green stripes. The flesh is orange and has a chestnut like flavour. Average weight: 200g	19
Squash ~ Uchiki Kuri	Uchiki Kuri is slightly ribbed with early maturity and high yield. This produces fruit sizes of 0.7g - 1.2kg with rounded fruits and is a strong and productive plant.	18 19 20 21 22
Squash ~ Waltham	Waltham Butternut" A popular cultivar of butternut squash, producing roughly bell-shaped fruits on trailing vines up to 2.5m (8ft) long. The smooth, pale orange, hard-skinned fruits, are ready to harvest in autumn and can reach around 1.8-2.3kg.	18 19 20 21 22
Strawberry ~ Estavana	F1 hybrid variety. Outdoor gutter summer production. High yielding, attractive fruit with long shelf life. Great tasting strawberries for retail.	11 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Strawberry ~ Rowena	This F1 hybrid strawberry plant is a high yielding with good weather resistance, making it an ideal variety to grow in open field culture.	11 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Sweede ~ Tweed	Tweed Sweede is a British bred vigorous growing hybrid with good club root resistance. This hardy winter root vegetable is an attractive well-formed uniform globe shape with purple shoulders and cream coloured flesh.	15 18 19 20 21 22 23 24 25 26 27 28 29 30
Sweet Pea ~ Old Spice Mixed	A stunning mixture of heirloom varieties with large blooms on long strong stems, ideal for cutting or adding colour to the garden. Sweet peas are an easy flower to grow. They are undemanding and pretty well disease free but like all plants will benefit from good treatment.	15
Sweet Pea ~ Purfume Delight	Large ruffled flowers in a wide range of colours all selected for their intense fragrance; ideal for cutting. Sweet peas are an easy to grow flower. They are undemanding and pretty well disease free but like most plants will benefit from good treatment.	15
Sweet Pepper ~ Bendigo F1	Early hybrid, ideal for unheated greenhouses and polytunnels, ripens from red to red; strong, open plant with attractive, blocky fruit produced evenly throughout the season; high yielding.	16 19
Sweet Pepper ~ Diablo	High yielding Ox-horn variety, producing long pointed fruits that typically mature at around 16cm in length. The skin is smooth, while the flesh is thick, crunchy and sweet. Plant has erect habit with medium spacing to internodes.	16 19
Sweet Pepper ~ Magno F1	High-yielding early variety with large, blocky fruit that colour to bright, deep orange; particularly well adapted to production in non-heated greenhouses and polytunnels. Magno produced the heaviest crop of ripe peppers in the Which trial.	16 19
Sweetcorn ~ Goldcrest	A mid-season, with a clean and tidy plant habit along with excellent husk and tip protection; this variety is sure to stand out whether being sold in the husk or as pre-packed cobs. Goldcrest will impress with its improved flavour and resistance to lodging.	18 19 20 21 22 23 24 25
Tarragon ~ Russian	Tarragon is a popular herb but the true French variety does not seed, the closest match is Russian Tarragon but the Russian variety is much harder. The plant will grow to a height of about 90cm (36").	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Thyme	Sun-loving herb with green downy leaves & small purple flowers. Many culinary uses. Hardy perennial evergreen.	15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
Tomato ~ Datter (Grafted)	Vigorous plants that produces glossy cherry sized baby plum tomatoes, that weigh an average of just 8g each. The thick skinned fruits have exceptional flavour with a good acidic bite with a lingering sweetness.	16 19
Tomato ~ Dorada	Blight-tolerant, irresistible golden-yellow cherry tomato (c.25g); early ripening; robust; mid-sized plant with average foliage density; suitable for outdoor production as well as glasshouses and polytunnels.	16 19
Tomato ~ Pozzano F1	San Marzano Italian plum type (c.135g); good range of resistances apart from blight - not suitable for outdoor production.	16 19
Tomato ~ Pozzano F1 (Grafted)	San Marzano Italian plum type (c.135g); good range of resistances apart from blight - not suitable for outdoor production.	16 19
Tomato ~ Primavera	Blight-tolerant, red-orange cherry fruit (c.25g) that melt in the mouth; especially juicy and fruit-sweet; early ripening; robust; mid-sized plant with average foliage density; suitable for outdoor production as well as glasshouses and polytunnels	16 19
Tomato ~ Rondobella	Rondobella is a large salad tomato with an exceptionally fruity taste and intense tomato flavour. Outstanding tolerance to late blight. The round red fruits are relatively firm and therefore ideal for salads and cooking. The tomatoes are hanging on small trusses with 4-6 fruits.	16 19
Tomato ~ Sakura (Grafted)	Small red cherry type.	16 19
Tomato ~ Vivagrande	Blight-tolerant beefsteak tomato (c.200g); aromatic flavour with good balance of sweetness and acidity; mid-season ripening; very robust, low-growing plant with medium foliage density; suitable for outdoor production as well as glasshouses and polytunnels	16 19
Turnip ~ Sweetbell F1	Sweetbell F1 is a small turnip [6-8cm diameter]. The flavour is exceptionally sweet with firm crisp texture and unlike most turnips, ideal for raw use in salads and stir-fry etc. as well as for cooking.	13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36
Winter Purslane (Claytonia)	Clump-forming plant about 8 inches (20cm) across. Leaves, stems and flowers are all edible - succulent with a mild flavour. Produces leaves for many weeks.	31 32 33 34 35 36 37 38 39 40 41
